

Michael Bryan Heramil

Full-Stack Web Developer & E-Commerce Specialist

mbheramil@gmail.com | +639932455740 | mbheramil.com

Experienced full-stack developer with **15+ years of WordPress development experience** and **10+ years of Shopify development experience**, specializing in e-commerce platforms, content management systems, AI automation, API integrations, and cloud infrastructure. Proficient in building custom solutions across WordPress, Shopify, Duda, Wix, and Pixel with extensive AWS experience. Expert in theme development, plugin architecture, Shopify app development, AI-powered workflow automation, serverless computing, and cloud-based deployments with a strong focus on scalable, performant web applications.

TECHNICAL EXPERTISE

WordPress Development - 15+ Years

- Custom Theme Development: Responsive theme creation from scratch, child themes, and theme customization
- Plugin Development: Custom plugin architecture, hooks/filters implementation, and WordPress API integration
- REST API: Custom endpoints, authentication, and third-party service integrations
- WooCommerce: Custom product types, payment gateway integrations, and checkout customization
- Advanced Custom Fields (ACF): Dynamic content management and custom field integration
- Gutenberg Blocks: Custom block development using React and block editor APIs

Shopify Development - 10+ Years

- Theme Development: Liquid templating, custom theme architecture, and responsive design
- Shopify App Development: Private and public app creation using Shopify APIs
- API Integration: Storefront API and Admin API implementation
- Custom Functionality: Metafields, webhooks, app extensions, and advanced automation
- Shopify Plus: Custom checkout experiences, scripts/functions, and enterprise workflows

AI Automation, Integration & Development

- AI-powered workflow automation for business processes, content operations, e-commerce tasks, and data handling
- LLM/API integrations for chatbots, assistants, content generation, SEO automation, and internal productivity tools
- Custom automation tools connecting WordPress, Shopify, CRMs, spreadsheets, webhooks, and third-party APIs
- Prompt-driven development, AI-assisted debugging, automated reporting, and process optimization

Platform Expertise

- Duda: Custom widget development, site API integration, and template customization
- Wix: Velo JavaScript development, custom apps, and database collections
- Pixel: Custom development, platform integration, and implementation

Cloud & Infrastructure (AWS)

- Lambda: Serverless function development and deployment
- EC2: Instance management, scaling, and configuration
- S3: Object storage, static site hosting, and CDN integration
- RDS: Database management and optimization
- CloudFront: Content delivery and distribution

Core Technologies

PHP | JavaScript (ES6+) | React | Node.js | HTML5 | CSS3/SASS | SQL | REST API | MySQL | AWS | Shopify Liquid | WordPress | WooCommerce | AI/LLM API Integrations | Automation Workflows

CORE COMPETENCIES

API Development & Integration

- RESTful API design and implementation
- Third-party API integration
- Webhook development
- OAuth and API security

AI Automation & Workflow Development

- AI automation strategy, integration, and implementation
- LLM-powered tools for content, SEO, customer support, and operations
- Automated data processing, reporting, and notification workflows
- Custom integrations between websites, apps, APIs, and cloud services

Plugin & Extension Development

- WordPress plugin architecture
- Shopify app development
- Cross-platform extensions
- Version control management

Theme & Frontend Development

- Custom responsive themes
- Mobile-first design
- Progressive Web Apps (PWA)
- Cross-browser compatibility

E-Commerce Solutions

- Payment gateway integrations
- Shopping cart optimization
- Inventory management systems
- Conversion tracking & analytics

Cloud Infrastructure (AWS)

- Serverless architectures with Lambda
- EC2 instance management & scaling
- S3 storage and CloudFront CDN
- RDS database optimization

PROFESSIONAL EXPERIENCE

Full-Stack WordPress Developer - 15+ Years

- Developed custom WordPress themes and plugins serving high-traffic websites
- Built RESTful APIs for headless CMS implementations
- Implemented WooCommerce solutions with custom payment integrations
- Created custom Gutenberg blocks and page builders
- Optimized site performance achieving 90+ PageSpeed scores

Shopify Developer - 10+ Years

- Developed custom Shopify themes using Liquid and JavaScript
- Built Shopify apps utilizing Admin API and Storefront API
- Implemented complex product configurations, variants, metafields, and custom workflows
- Created custom checkout experiences for Shopify Plus merchants
- Integrated third-party services via webhooks and APIs

AI Automation Integration Developer

- Designed and implemented AI-powered automations for web, e-commerce, SEO, and internal business workflows
- Integrated AI/LLM APIs into WordPress, Shopify, and custom applications
- Built automation tools for content generation, data cleanup, reporting, and repetitive task reduction
- Connected cloud services, APIs, databases, and webhooks into automated workflows

Cloud & DevOps Engineer (AWS)

- Architected and deployed scalable applications using AWS Lambda, EC2, and S3
- Implemented serverless architectures with Lambda functions for automated workflows
- Managed EC2 instances with auto-scaling and load balancing configurations
- Optimized application performance using CloudFront CDN and RDS database services
- Developed CI/CD pipelines for automated deployment to AWS infrastructure

Multi-Platform Developer

- Developed custom solutions across Duda, Wix, WordPress, Shopify, and Pixel platforms
- Created cross-platform integrations connecting multiple services
- Built API bridges between different e-commerce platforms
- Provided technical consulting for platform migrations

KEY PROJECTS & ACHIEVEMENTS

AWS Serverless Architecture: Designed and deployed scalable serverless applications using Lambda, API Gateway, and DynamoDB with automated CI/CD pipelines

Cloud Migration & Optimization: Migrated legacy applications to AWS infrastructure with EC2, RDS, and S3, improving performance and reducing costs by 40%

AI Automation Integration: Built AI-assisted workflows and custom automation tools for e-commerce, SEO, content management, reporting, and operational efficiency

Custom WordPress E-Commerce Platform: Built multi-vendor marketplace with custom payment splitting and commission system

Shopify App Development: Created inventory sync app connecting Shopify stores with external ERPs

Headless WordPress: Implemented React-based frontend consuming WordPress REST API

Theme Framework: Built reusable component library for rapid Shopify theme development

ADDITIONAL SKILLS

- Agile/Scrum methodologies and project management
- Technical documentation and code review
- Client communication and requirement gathering
- Security best practices and vulnerability assessment
- Performance optimization and debugging
- Responsive email template development
